

Dear Sirs,

I urge you to reject NAB petition 04-160. This is a clear indication of one entitiy trying to strangle competition. I pay to have satelite service provided by XM. I was thrilled when they started offereing traffic and weather for Pittsburgh PA. I woul have to wait 20-30 minutes on my local radio stations to play this in the morning when I could have an update within 5 minutes on XM. DO NOT ALLOW THIS TO PASS. This is a ridiculous attempt to maintain a monopoly and strangle the competition. You the FCC should be ashamed if you pass this. But hey, you are the government and money talks. You listen to big business, not what the public wants or deserves.

Sincerely,

Matthew J Kiesling
